GENERAL GOVERNMENTAL ACCOUNTING POLICIES

PRINCIPLES

In adopting the State Accounting Procedures Law (NRS 353.291), it is the Legislature’s intent to establish an accounting system that:

- Presents fairly and with full disclosure the financial position and the results of financial operations of the funds of the state in conformity with generally accepted accounting principles; and
- Determines and demonstrates compliance with legal and contractual requirements related to finance.

The state accounting system operated by the Controller records and reports all monies received and disbursed by the State agencies. This is accomplished through the timely recording of deposits and disbursements within an accounting structure that adheres to the legal/budgetary requirements. State officers, boards, commissions and department heads are to provide the information necessary for the Controller to report the financial position and results of operations of the State’s funds (NRS 353.3245).

DEFINITIONS

**Accounting System** - the total structure of records and procedures which record, classify, summarize and report information on the financial position and results of operations of the State’s funds and organizational components.

**Accrual Basis** – the method of accounting that recognizes the financial effect of transactions, events, and interfund activity when they occur, regardless of the timing of related cash flows. The accrual basis of accounting is used by proprietary funds, fiduciary funds and the government-wide statements.

**Appropriation** - a legislative allocation from the State General Fund or State Highway Fund for a specific purpose or for operations of an agency. An appropriation usually is limited in amount and the time during which it may be expended.

**Authorization** – the authority granted by the Legislature that allows State agencies to collect and expend funds from sources other than the General Fund or Highway fund, such as federal funds, county funds, gifts, grants, donations, fees, sales and charges for services.

**Balance Forward** – authorization remaining in a budget account at the end of a fiscal year that is carried forward to the next fiscal year; can also represent the return of the unused portion of non-appropriated amounts from the receiving fund/budget account to the originating fund/budget account.

**Budget** - a plan of financial operation embodying an estimate of proposed expenditures for a given period and the proposed means of financing them. The term “budget” is used to designate both the preliminary financial plan presented to the Legislature and the plan finally approved.
Budgetary Accounts - those accounts used to record the formally adopted annual operating budget in the accounting system as part of the management control technique of formal budgetary integration.

Cash Basis - the basis of accounting under which transactions are recognized only when cash is received or disbursed.

Encumbrance - an obligation in the form of a purchase order or contract commitment for which an estimated amount has been reserved but the actual goods or services have not yet been received.

Expenditure - a decrease in financial resources of a governmental fund other than through interfund transfers. Expenditures include the cost of goods delivered or services rendered whether paid or unpaid, payment of principal and interest on general long-term debt, and capital outlays. For financial reporting, the term does not include an encumbrance.

Expense - an outflow or other use of assets or incurring of liabilities (or a combination of both) from delivering or producing goods, rendering services or carrying out other activities that constitute the entity’s ongoing major or central operations. The term is generally associated with the outflows of proprietary funds or funds that have the same basis of accounting as a proprietary fund.

Fiscal Year - the twelve-month period at the end of which a governmental unit determines its financial position and the results of its operations. The State’s fiscal year ends on June 30.

Fund - an independent fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities and residual equities or balances, and changes therein, which are segregated to carry out specific activities or attain certain objectives in accordance with special regulations, restrictions, or limitations.

Fund Balance – the net position of a governmental fund (difference between assets, liabilities, deferred outflows of resources, and deferred inflows of resources).

General Ledger (GL) Accounts - all accounts necessary to record the financial activity and set forth the financial position and results of operations of a fund. In the Advantage financial system, revenue GL’s are referred to as “revenue sources”, and expenditure GL’s are referred to as “objects.”

Liability - a debt or other legal obligation arising out of a transaction in the past, which must be liquidated, renewed, or refunded at some future date.

Modified Accrual Basis - the basis of accounting used by governmental funds. Under this method, revenues are recognized when they become susceptible to accrual, that is, when they become both “measurable” and “available” to finance expenditures of the fiscal period. “Available” means collectible in the current period or soon enough thereafter to be used to pay liabilities of the current period. Expenditures are recognized in the period in which the related liability is normally liquidated rather than when the liability is first incurred. An exception is for supplies inventories and prepayments which may be recognized when incurred (purchase method) rather than when the inventories are actually used or during the period benefited by the prepayment (consumption method).
Net Position – the residual of all other financial statement elements presented in a statement of financial position, which is the sum of assets and deferred outflows of resources reduced by liabilities and deferred inflows of resources.

Nevada Revised Statutes (NRS) – the statutory law of Nevada enacted by the Legislature, with such law arranged in an orderly manner by subject, and updated after every regular legislative session.

Revenue – financial resources available to finance expenditures within a budget account during a fiscal period. For financial statement reporting, revenues result in an increase in fund balance/net position during a designated period of time as a result of additions to assets which do not increase any liabilities, or the cancellation of liabilities without a corresponding increase in other liabilities or a decrease in assets. Types of revenues for State budgetary and financial reporting include:

- **Authorized Revenue** – a source of revenue authorized by the Legislature to be deposited to the credit of the department, institution or agency, which assessed it or received it to be expended for the specific activities;
- **Unappropriated Revenue** – a source of revenue which is unrestricted and is fully available for legislative appropriation. The Legislature may make appropriations only to those functions authorized by the law establishing each fund.
- **Restricted Revenue** – financial resources which are subject to constraints that are either 1) externally imposed by creditors, grantor, contributors, or laws or regulations of other governments or 2) imposed by law through constitutional provisions or enabling legislation; and
- **Unrestricted Revenue** – a source of revenue which does not meet the definition of restricted revenue.

Reversion – the balance of a General Fund or Highway Fund appropriation that is remaining after the close of a specific time period and is returned to the original source of the appropriation.

FUND CLASSIFICATIONS

Governmental Funds – These funds use the flow of current financial resources measurement focus and the modified accrual basis of accounting. Governmental funds include:

- **General Fund** – The chief operating fund of the State; accounts for all financial resources not accounted for in another fund;
- **Special Revenue Funds** – Account for the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects and exclusive of resources held in trust for individuals, private organizations, or other governments;
- **Capital Projects Funds** – Account for financial resources that are restricted, committed, or assigned to expenditure for capital outlays including the acquisition or construction of capital facilities and other capital assets other than those financed by proprietary funds;
- **Debt Service Funds** – Account for the accumulation of resources that are restricted, committed, or assigned to expenditure for principal and interest; and
• **Permanent Funds** – Account for resources that are legally restricted to the extent only earnings, and not principal, may be used for purposes that support the State’s programs.

**Proprietary Funds** – These funds are accounted for on the flow of economic resources measurement focus and use the accrual basis of accounting. Proprietary funds include:

- **Enterprise Funds** - Account for those operations that are financed and conducted in a manner similar to private business and for which a fee is charged to external users for goods or services; and
- **Internal Service Funds** - Account for operations that provide goods or services to other funds, departments or agencies of the State or other governments, on a cost-reimbursement basis.

**Fiduciary Funds** – These funds are used to report assets held in a trustee or agency capacity for others and which therefore cannot be used to support the State’s own programs. Fiduciary funds include:

- **Pension and Other Employee Benefit Trust Funds** - Account for resources that are required to be held in trust for the members and beneficiaries of pension plans, other post employment benefits plans, or other employee benefit plans;
- **Investment Trust Funds** – Account for external portion of investment pools reported by the sponsoring government;
- **Private-purpose Trust Funds** - Account for trust arrangements under which principal and income benefits individuals, private organizations or governments; and
- **Agency Funds** - Account for assets that the State holds for others in a purely custodial capacity. Agency funds typically involve only the receipt, temporary investment, and remittance of fiduciary resources to individuals, private organizations, or other governments, and do not present results of operations.
STATE POLICIES AND PROCEDURES

PROMULGATION

The Controller is responsible for the administration of the provisions of the State Accounting Procedures Law, and in this capacity provides and maintains the state accounting system which produces financial statements, budgetary reports, and management reports both statewide and by agency. The responsibility for promulgating and establishing accounting policy rests with the Controller.

CONTROLLER’S OFFICE ACCOUNTING LIAISONS

The Controller’s Office has assigned an accountant to each agency throughout the State to serve as a liaison regarding the application and interpretation of accounting policies to specific transactions. A list of liaisons for each agency is located at:
http://scointranet.nv.gov/component/edocman/?task=document.viewdoc&id=579&Itemid=0.

Accounting liaisons may also be reached by calling the Controller’s Office main line at 775-684-5750.

POLICIES

PREPAID EXPENSES

Statement of Policy Prepaid expenses will be allowed during the last month of the fiscal year when one of the following occurs:

- It is necessary to have a check to the vendor by the first week of July.
- A payment will result in substantial savings to the State.

If it is necessary to incur a prepaid expense prior to the last month of the fiscal year, contact your accounting liaison.

Purpose To record prepaid expenses at end of fiscal year.

Reference NRS 353.3245 - Generally accepted accounting principles are to be followed. Controller is to be provided with accounting information.

Procedures Two documents must be processed to complete the initial recording and subsequent clearing of the prepaid expense, as follows:

- A current year payment voucher is prepared charging balance sheet account 1735 - Prepaid Expenses, at the fund level only.
- A future year journal voucher is submitted to the Controller’s Office at the beginning of the new fiscal year:
Debit the expense to the proper budget account
Credit balance sheet account 1735
Reference the original payment voucher document number in the line description field
Add the vendor number to the “Code” field on both the expenditure line and the balance sheet account 1735 line.

Controller’s Office will not process a future year journal voucher until the official opening of the new fiscal year.

**TRAVEL ADVANCES**

**Statement of Policy**  State officers and employees may receive a travel advance to cover anticipated travel expenses from the agency budget account at the discretion of the agency.

**Purpose**  To properly account for travel advances.

**Reference**  NRS 281.172 - Any state officer or employee may apply for a travel advance by filing a request with the administrative head.

NRS 281.175 - The State Controller may make reasonable rules and regulations to carry out the provision of NRS 281.172.

**Procedures**  Create a PV to issue a check (or EFT) to the employee for travel using object code 6005 – Travel Advance Clearing. Once the trip is completed, create a JVD to allocate (debit) the travel expenses to the proper object codes and record the offset (credit) to object 6005. Note that the offset must zero out object 6005 for each employee that received a travel advance.

**UNEARNED REVENUE (FUTURE YEAR DEPOSITS)**

**Statement of Policy**  State agencies must record the receipt of unearned revenue when appropriate.

**Purpose**  To properly record unearned revenue and recognize revenue in the correct fiscal year.

**Definition**  Unearned revenues arise from resource inflows that do not yet meet the criteria for revenue recognition. For example, money has been received for goods or services to be delivered at a future date. The obligation to deliver goods or services at a future date is the unearned revenue liability.

**Reference**  NRS 353.3245 - Generally accepted accounting principles are to be followed. Controller is to be provided with accounting information.
Procedures

Before recording an unearned revenue (or a future year deposit), the agency must contact their accounting liaison in the Controller’s Office to determine or confirm that the revenue should be considered unearned.

Two documents must be processed to complete the initial recording and subsequent clearing of the unearned revenue, as follows:

- A current year cash receipt is prepared crediting balance sheet account 2303 - Future Year Deposits, at the fund level only.
- A future year journal voucher is submitted to the Controller’s Office at the beginning of the new fiscal year:
  - Debit balance sheet account 2303
  - Credit the revenue to the budget account
  - Reference the original cash receipt document number in the line description field

Controller’s Office will not process a future year journal voucher until the official opening of the new fiscal year.

INTERAGENCY BILLING CLAIMS AND JOURNAL VOUCHERS

Statement of Policy

Interagency transactions must be made on billing claims or journal vouchers and need to be processed as exclusively interfund or exclusively intrafund; no mixtures on the same document are allowed. A billing claim is used to record transactions between or within agencies for charges for services or goods. A journal voucher is used to record transfers between funds and/or agencies, as well as to record corrections to transactions already posted. Checks issued to other State agencies are only allowed when making a payment to a State agency’s outside bank account.

Purpose

To eliminate intrafund transactions at the fund level.

Reference

NRS 353.3245 - Generally accepted accounting principles are to be followed. Controller is to be provided with accounting information.

Procedures

An intrafund document must use the same fund number coding on all lines in both the debit and credit portions.

A document is interfund when the fund number coding in the debit portion is different from the fund number in the credit portion. Several different fund numbers may be used on an interfund document as long as all the debits are different fund numbers from all the credits.

If you need help in distinguishing between the two types of documents, contact your assigned accountant. A document mixing these two types of transactions will be rejected or reversed.
When preparing a journal voucher to correct or change an expenditure general ledger account originally coded on a payment voucher, the vendor number must be entered on both the debit and credit lines of the correcting journal voucher in the vendor “Code” field. This is to ensure that payments to vendors are reported correctly to the IRS on Form 1099.

INTERAGENCY TRANSFERS

Statement of Policy Interagency transfers must be recorded using transfer-in and transfer-out general ledger accounts.

Purpose To ensure transfers-in offset transfers-out (must net to zero) for financial reporting purposes.

Reference NRS 353.3245 - Generally accepted accounting principles are to be followed. Controller is to be provided with accounting information.

Procedures The agency recording the transfer-in must use one of the transfer-in revenue sources 4600 – 4781. The agency recording the transfer-out must use one of the transfer-out objects 9001 – 9169 (but excluding 9159). Both the debit and credit portions of the document must use appropriate transfer general ledger accounts that net to zero.

ESTABLISHING A NEW REVENUE SOURCE

Statement of Policy Revenue source GLs established in a budget account must be approved by both the Budget Division and the Controller’s Office.

Purpose To ensure proper reporting of revenues for financial reporting purposes.

Reference NRS 353.3245 - Generally accepted accounting principles are to be followed. Controller is to be provided with accounting information.

Procedures Based upon the source and type of the new revenue/receipt, select an appropriate revenue source GL from the Chart of Accounts. Refer to the General Ledger Account Definitions section of this document for classifications and descriptions of revenue sources/receipts. Contact your accounting liaison to confirm that the GL selected is appropriate. Your accounting liaison will also need a reference to the legislative or other authority authorizing collection of the revenue/receipt.

The revenue source will be established in the agency’s budget account upon receipt of either a Budget Account File Maintenance Request or a work program signed by Budget Division, and a reference to the NRS or other authority allowing collection of the revenue/receipt.
FEDERAL REVENUES AND EXPENDITURES

Statement of Policy
All state agencies that are recipients (either primary or sub) of federal assistance must identify the receipt and use of the assistance. The identification must incorporate the Catalog of Federal Domestic Assistance (CFDA) number and be reflected in the records of the State central accounting system or another accounting system approved by the Controller. It is the responsibility of the primary recipient of federal assistance to determine the CFDA number and communicate this number to sub-recipients and ensure that federal reporting is monitored for accuracy.

Purpose
To establish a policy for recognizing the receipt and expenditure of federal money, including movement between State agencies, so the State can comply with the federal Single Audit Act and the Cash Management Improvement Act (CMIA).

References
NRS 227.140 - The Controller may adopt regulations to comply with federal laws.
NRS 353.3245 - Generally accepted accounting principles are to be followed. Controller is to be provided with accounting information.
CMIA 1990 31 CFR part 205 - Rules and procedures for the transfer of funds between the federal government and states for federal grants and other programs.
OMB Circular A-133/2 CFR part 200, subpart F – Non-federal entity’s responsibilities for managing Federal assistance programs and the auditor’s responsibility.

Definitions

State agency as a sub-recipient:
A State agency is a sub-recipient if it receives federal assistance from another State agency to carry out or administer a federal program. Distinguishing characteristics of a sub-recipient include items such as:

- Determining the eligibility of the beneficiaries of the program and/or the activities required to carry out or administer the program;
- Performance is measured against meeting the objectives of the program;
- Responsibility for making decisions under the program;
- Responsibility for applicable compliance requirements; and
- Use of the funds to carry out a program of the sub-recipient, as opposed to providing goods or services for the use of another agency.
State agency as a vendor:
A State agency is considered a vendor when it has a contract to provide specific goods or services related to the administrative support of a federal program. The contract may provide goods or services for the direct use of the State agency that is a recipient of the award or for the beneficiaries of the program. Where a recipient enters into a contract to buy goods and services, the other party is not a sub-recipient for purposes of the Single Audit Act and the CMIA (although such recipient may be considered a fiscal agent). Distinguishing characteristics of an agency acting as a vendor include items such as:

- Providing the goods or services within normal business operations;
- Providing similar goods or services to other purchasers;
- Program compliance requirements do not pertain to the goods or services provided; and
- Specifications or scope of the work are defined in the procurement contract by the recipient state agency.

Non-state entity as a sub-recipient:
Non-state entities may also be sub-recipients if they meet the distinguishing characteristics of a sub-recipient as stated above in the definition of a State agency as a sub-recipient.

Fiscal Agent:
A fiscal agent of the state is an entity that pays, collects or holds federal funds on behalf of the State for a federal program, excluding private non-profit community organizations. The CMIA includes fiscal agents in its definition of a state.

Procedures
Coding Receipts and Expenditures:
All receipts of federal assistance grants must be recorded to a revenue source GL in the series 3401-3600, using the job number field on the Advantage document to record the CFDA number of the grant. All expenditures of federal assistance grants must be coded with the CFDA number of the grant using the job number field on the Advantage document.

For both revenues and expenditures related to federal assistance grants, the first 5 characters of the job number must contain the CFDA program number and the 6th and 7th characters must be the last two digits of the Federal fiscal year in which the grant was awarded. The 8th character, if needed to identify several grants under the same CFDA number in the same Federal fiscal year, should be alphabetic. For any remaining ARRA (Recovery Act) grant transactions, the 8th character must be a “Z”. If further tracking is needed internally for different projects of a specific grant, the Advantage “function” and “activity” codes can be utilized. These codes are agency specific.
State agencies must use the appropriate accounts to record the movement of federal assistance resources from one agency to another or to a non-state sub-recipient using the following guidelines:

- **State agency as a sub-recipient** – if there is a recipient to sub-recipient relationship between State agencies, both agencies must use transfer general ledger accounts to move the resources from one agency to the other. Use GL series 4601-4781 for transfers-in and GL series 9001-9169 for transfers-out, coding both lines of the document with the same CFDA number in the job number fields. The sub-recipient must use the same CFDA number in the job number field when recording expenditures.

- **State agency as a vendor** – if the receiving agency is acting as a vendor, the originating agency must use an expenditure general ledger account (object) and the receiving agency must use a non-federal revenue general ledger account (revenue source) to record a charge for goods or services in the GL series 3801-4355. The originating agency must identify the expenditure of federal resources using the CFDA number by coding it to the job number field in Advantage. The receiving agency does not need to identify the transactions for federal tracking.

- **Non-state entities as a sub-recipient** – a State agency that is the prime recipient must record the movement of federal assistance to the non-state sub-recipient using an expenditure general ledger account (object) in either the 8500, 8600, or 8700 Aid Series (excluding 8701) in the Advantage system. The transaction must be identified with the CFDA number of the grant by coding it to the job number field in Advantage.

**Correcting Transactions:**
The Cash Management Improvement Act (CMIA) requires the State to draw federal funds in such a way as to minimize the amount of time federal funds are in the State’s bank account. For major federal programs, CMIA also requires the State to calculate an interest amount based on how federal funds were managed. To make this calculation as accurate as possible, it is often necessary to correct previously recorded transactions using the following guidelines:

- To correct a Cash Receipt (CR) using a Decentralized Journal Voucher (JVD) document, the “Date of Record” is the date the deposit was made at the bank, or the “Record Date”. Use the job number to enter the CFDA number of the grant.

- To correct a Payment Voucher (PV) using a JVD document, the “Date of Record” is the date the document was accepted by the system, or the “Process Date”. Use the job number to enter the CFDA number of the grant.

**Single Audit Reporting Forms:**
The Single Audit Reporting Form is automated in the Advantage/DAWN system. It is mandatory that the correct job number containing the CFDA number is recorded with all federal grant transactions to allow reconciliation of federal
revenues and expenditures in this system. All federal grant transactions include receipts, expenditures, transfers-in and transfers-out.

The following reports may be used to review your federal activity:

- **Discoverer Statewide Reports**: The “Revenue GL Detail” report can be run to ensure that all federal revenue and transfer-in GL’s include job numbers. The “Expenditure GL Detail” report can be run to ensure that all expenditures and transfer-out GL’s include job numbers.

- **DAWN Reports**: The “Job Report Menu” located under “Reports” has options for running various reports by job numbers. The “Single Audit Award Transaction Detail” located under “Inquiries and File Downloads” is organized by award number for the selected agency.

Corrections to job numbers can be made by processing a JVR document, thereby adding or removing job numbers on transactions that should be identified as federal revenues or expenditures. Examples of this would be when expenditures are denied by the Feds after being processed, when a job number was omitted from a federal receipt or expenditure, or when a job number was entered on only one line of a JVD transferring federal monies between State agencies.

**BOND PROCEEDS AND EXPENDITURES**

**Statement of Policy**  All state agencies that are recipients of bond proceeds, including Taxable Direct Pay Build America Bonds, must identify the receipt and use of bond proceeds by each bond issue. An agency receiving interest earnings on bond proceeds must identify the interest earnings by the specific bond issue and must expend the interest earnings for the purpose of that issue. Only those programs given statutory authority may utilize bond proceeds and/or the interest earnings on those proceeds to defray costs directly related to capital expenditures financed by an issue (e.g., initial operating/administering of the program) in an amount not to exceed five percent of the bond issue less any Treasurer’s assessment, for operations. In reference to Build America Bonds, no (zero) amount/percentage of the proceeds and/or interest earnings on bond proceeds may be utilized for operating costs and all proceeds and interest earnings must be used for Capital Improvement Projects. Unexpended bond proceeds and interest received in the budget beyond the purpose of the bond issue and the reservation of arbitrage rebate due must be returned to the Treasurer’s Office to pay debt service on the bonds. The State is committed to minimizing the cost of arbitrage rebate and yield restriction while strictly complying with the Tax Code.

**Purpose**  To establish a policy for identifying the receipt and expenditure of each bond issue to enable the Arbitrage Compliance Specialists (State Contractor) to compute arbitrage rebate in accordance with the Internal Revenue Code.
References

NRS 227.140 - The Controller may adopt regulations to comply with federal laws.

NRS 233C.200 section 5 and 233C.230 section 2 - Preservation and Promotion of Cultural Resources.

IRS Tax Code sections 1.148-0 to 1.148-9 - Arbitrage Regulations; 54AA Build America Bonds

Assembly Bill No. 9 Section 3 #5 of the 2001 17th Special Session – General Obligation bonds

Lake Tahoe Basin Act of June 8, 1999 - Chapter 514 Section 2 #5

Treasurer’s Office – State of Nevada State Debt Issuance Policies and Procedures

Definitions

Arbitrage rebate computation – is based on the difference between the amount actually earned from investing tax exempt bond proceeds and the amount that would have been earned if those investments had a yield equal to the yield on the bond issue. The amount earned above the bond yield must be paid to the federal government unless an applicable spending exception applies.

Procedures

All receipts of bond proceeds are to be recorded to the appropriate revenue source GL’s 4902, 4904 and 4905, and must include the job number field on the Advantage document to record the bond issue. The specific bond job number (four digits) will be assigned at the time of the bond issuance by the Treasurer’s Office. All expenditures as well as the interest earned on the bond proceeds must be coded with the bond issue using the job number field on the Advantage document.

After the initial deposit of bond proceeds is recorded by the Treasurer’s Office, any transfer-out of bond money or interest on bond money to another budget account and/or fund must be coded to GL 9067 – Transfer Out Bond Proceeds Only, and the corresponding transfer-in must be coded to GL 4666 – Transfer In Bond Proceeds Only. GL’s 9067 and 4666 must be used together on an Advantage document, and both lines must identify the bond issue with the specific bond job number. The only exceptions to this is the transfer of bond proceeds between the State and its discretely presented component units (e.g. NSHE and CRC) or NDOT, which are to be recorded as expenditures.

A transfer out of bond money is not considered an expenditure until the agency receiving the transfer expends the funds. The agency receiving the transfer of bond funds must also identify the use (expenditure) of the bond proceeds by the job number of the issue. Supporting documents must be retained by the State agency until three years after the final redemption date of the bonds. A Refunding bond issue is treated as replacing the original new money issue. Thus, records relating to the original new money issue and the refunding issue must be retained until three years after the final redemption of both bond issues.
CAPITAL ASSETS

Statement of Policy  Record assets in a manner to demonstrate accountability, demonstrate stewardship and to allocate costs when applicable.

Purpose  To outline procedures and policies necessary for the accountability and reporting of capital assets.

Reference  NRS 353.3245 - Generally accepted accounting principles are to be followed. Controller is to be provided with information for accounting.
State Administrative Manual (SAM) 1500.

Capitalization Classes

Infrastructure assets: These assets are defined as long-lived capital assets that normally are stationary in nature and normally can be preserved for a significantly greater number of years than most capital assets. Examples are highways and roads, easements, rights-of-way, bridges, tunnels, drainage systems, water and sewer systems, dams, lighting systems, etc.

Land: All land acquisitions, including land acquired for infrastructure, are to be capitalized and must be reported to the Controller. Land is non-depreciable. Right-of-ways, easements and water rights are considered part of the land unless included within the infrastructure class.

Buildings and building improvements: All building acquisitions or building improvements of $500,000 or more are to be capitalized. Building improvements include additions, major repairs, and reinstallations/rearrangements on existing buildings. (Note: Improvements are not maintenance or replacement items - e.g. carpets, furnaces, etc.). Equipment items purchased in conjunction with new buildings are to be specifically identified and recorded as equipment.

Improvements other than buildings: These improvements occur as a result of increasing the existing level of service in a parcel of land. Items would include costs incurred for paving, lighting systems, yard lighting, landscaping, fencing and other site improvements. All such improvements that have an expected life greater than one year and a cost of $500,000 or more are to be capitalized.

Furniture and equipment: All furniture, equipment, vehicles and computer software with an expected life greater than one year and a cost of $5,000 or more per unit are to be capitalized. There are gray areas of classification. For example, if separate components costing less than $5,000 are put together to create a system costing more than $5,000, the system should be capitalized. If you are not sure whether or not an item should be capitalized, consult with your accounting liaison.
Intangible assets: These assets possess three characteristics: 1) lack of physical substance, 3) nonfinancial in nature, and 3) initial useful life extending beyond a single reporting period. Examples are internally developed software, mineral rights, patents, trademarks and copy rights. If you are unsure whether an item qualifies as an intangible asset, consult with your accounting liaison.

Construction in progress: This represents amounts expended for construction of a project that will be completed in a future fiscal year. The portion of construction contracts of $500,000 or more paid during a fiscal year on buildings/building improvements, or $500,000 or more on improvements other than buildings are to be capitalized at fiscal year end. On completion of the construction project, the total cost of the project should be reclassified to buildings or improvements other than buildings.

Procedures

Purchased assets:
All capitalizable assets bought through Purchasing Division will automatically create a capital asset shell in the Advantage Fixed Asset Subsystem, as long as the correct commodity code is used. Purchasing staff will complete and finalize the capital asset shell once all documents related to the purchase have processed, resulting in a capital asset record.

For non-tagable capital assets bought through Purchasing Division that meet the Controller’s $5,000 capitalization threshold, the Purchasing Division will issue a State ID tag which must be attached to the invoice/receiving document when possible. The agency is required to maintain backup documentation referencing the tag number.

Computer software purchases with a cost of $5,000 or more (per license) should be coded to ‘7770’ (Computer Software). Purchasing Division will issue a State ID tag, which must be attached to the license when possible, and in all instances the agency is required to maintain backup documentation referencing the tag number.

For tagable capital assets not bought through Purchasing Division (non-Purchasing PV and no PC reference document), it is the agency’s responsibility to forward a copy of the invoice and a completed Property Disposition Report to Purchasing Property Management staff so a tag can be issued and a capital asset record created in Advantage.

Leased assets:
Leased assets or assets acquired by installment purchase, should be capitalized and reported to the Controller upon acquisition if the lease meets the criteria as established in the Statement of Financial Accounting Standards, No. 13. Determination will be made by the Controller’s Office if the criteria are met. However, the agency must provide a copy of the lease with all attachments to their accounting liaison. In addition, the agency is responsible for filing IRS form 8038G

CB revision – April 2019
or 8038GC for all leases determined to be capital leases. A copy of the form filed with the IRS is to be sent to the accounting liaison.

**Donated assets:**
Donated assets should also be reported if acquisition value upon receipt exceeds the minimum value as stated in the capitalization classes. Acquisition value is the price that would be paid to acquire an asset with equivalent service potential in an orderly market transaction at the acquisition date, or the amount at which a liability could be liquidated with the counterparty at the acquisition date. Non-cash assets received from donors should be recorded at the acquisition value plus any ancillary expenses incurred by the agency to place the asset into service. Donated assets with an acquisition value of $5,000 or greater should have independent third party documentation to support the amount of the donated asset at the time of receipt. Sources for documentation can be notes taken from verbal responses made by vendors in the market or copies of information taken from wholesale or retail catalogs to support replacement cost.

**Internally generated software:**
Software is considered internally generated if it is developed in-house or by a third-party contractor on behalf of the agency. In order for the Controller’s Office to properly capitalize the outlays associated with the development of software projects costing $1,000,000 or more, each agency must provide to their accounting liaison: 1) a complete description of the project, 2) the project start and completion dates, and 3) all direct costs for the software development. It is the agency’s responsibility to maintain verifiable records for all direct costs related to the software development. Once completed, the software will be amortized over the estimated useful life, which will be determined in collaboration with IT staff developing the software. Please notify your accounting liaison of any software development projects before starting the project.

**Impaired assets:**
A capital asset is considered impaired when its service utility has declined significantly and unexpectedly. Governmental Accounting Standards Board Statement No. 42, *Accounting and Financial Reporting for Impairment of Capital Assets and for Insurance Recoveries* establishes accounting and financial reporting standards for impairment of capital assets. If an agency suspects they have an impaired capital asset, obtain direction from your accounting liaison.

**Annual inventory:**
Agencies are required under NRS 333.220 to conduct an annual physical inventory of their personal property and to report the disposition of property to the Department of Administration, Purchasing Division. Once all corrections and updates have been made to your inventory, the “FADU” table within the Advantage System must be updated, noting the month and year of completion of your physical inventory. This update is necessary to ensure that capital assets are properly reported in the State’s annual financial report.
REPLACEMENT OF PROPERTY/EQUIPMENT

Statement of Policy  Replacement equipment is to be recorded net of insurance reimbursements.

Purpose  To provide accountability for replacement of personal property/equipment when there is an insurance reimbursement.

Reference  NRS 353.3245 – Generally accepted accounting principles are to be followed. Controller is to be provided with accounting information.

Procedures  If an agency purchases replacement equipment and receives an insurance reimbursement:

- Agency charges normal equipment object within own budget.
- When reimbursement is received within the same fiscal year that the replacement is made, a journal voucher is completed:
  - Debiting object 8819 in Risk Management’s budget for the loss net of deductible (reimbursement amount)
  - Crediting the agency’s normal equipment object
- When reimbursement is received in a different fiscal year, a journal voucher is completed:
  - Debiting object 8819 in Risk Management’s budget for the reimbursement amount
  - Crediting revenue source 4200 for insurance recoveries in the agency’s fund and budget.

If Risk Management purchases and pays for replacement equipment for an agency:

- A claim recording the purchase should be charged against object 8819 in Risk Management’s budget, and
- A journal voucher should be processed for the deductible amount:
  - Debiting the agency’s normal equipment object, and
  - Crediting revenue source 4335 in Risk Management’s budget.

PAYROLL OVERPAYMENT

Statement of Policy  Central Payroll should be notified immediately upon discovery of any overpayment and especially when there has been a termination of employment.

Purpose  To increase the likelihood of recovery when an overpayment of salary or benefits has occurred.
ACCOUNTING POLICIES AND PROCEDURES

Reference

Procedures

Current employee:
Agency should notify Central Payroll of overpayment by next pay period.

• The employee must be notified of the overpayment in writing.

• If employee is still with agency, and the overpayment is not disputed, the overpayment should be resolved by adjustment in next pay period.

If the employee disputes the overpayment, the employee may request a hearing with the State Controller within 10 days of receipt of the overpayment letter. (NRS 227.150)

Terminated employee:
Agency should notify Central Payroll immediately upon discovery. The agency will send a certified letter to the overpaid terminated employee at the last known address informing them of the debt owed and that if the debt is not resolved their account will be referred to a collection agency. If the letter is returned, the account should be referred to Central Payroll and determination made regarding whether the debt is uncollectible.

If it is determined the employee has filed bankruptcy or is deceased, the account will be referred back to the agency to have their staff or their assigned deputy attorney general file in bankruptcy court or in probate.

Central Payroll should refer the accounts to the Controller’s Office for collections. Upon receiving the files the Controller’s Office searches for the debtor’s current address information by using Lexis Nexis. The Controller’s Office sends a letter to the debtors giving two different options: 1) pay in full the amount owed or 2) set up a payment plan acceptable to the Controller’s Office. Attached to the letter is a payment plan agreement that the debtor can modify or sign. If the debtor does not respond to the letter within 15 business days, the account will be referred to one of the three private collection agencies.

In cases of disputed debt, the Controller will review the matter with the Attorney General to determine the appropriate action to be taken. The Attorney General will be directed to pursue prosecution for recovery of the funds if other collection methods are not successful, and the Controller will provide the Attorney General with the certified paperwork to use in the prosecution. The Attorney General will notify the Controller’s Office of any suits filed in small claims court at time of filing, or files they are closing.

FISCAL YEAR CORRECTIONS

Statement of Policy
Accounting transactions must be recorded in the fiscal year to which the transaction is attributable to.
Purpose
To provide a mechanism for moving transactions from one fiscal year to another while dual fiscal years are open.

Reference
NRS 353.3245 - Generally accepted principles of accounting to be followed. Controller is to be provided with information for accounting.

Procedures
To correct documents processed to the wrong fiscal year, the agency must process two Decentralized Journal Vouchers (JVD), one in each fiscal year. The first will reverse the posting to the wrong fiscal year, and the second will record the posting to the correct fiscal year. Procedures to correct fiscal years on cash receipts (CR), payment vouchers (PV), and journal vouchers/billing claims (JV) are as follows:

1) Correcting a cash receipt (CR) transaction:

a) Prepare the first JVD to reverse the original CR in the same (wrong) fiscal year it was recorded in Advantage:

- **Line 1** (credit line) – use the account type ASSET and the balance sheet account # 1000 (Cash). The description on this line MUST begin with “FY Corr” and then followed by how the cash should be classified for CAFR purposes. Corrections to CR’s will display either the description “FY Corr Accounts Receivable” or “FY Corr Unearned Revenue”. The description depends on two factors:
  1) The date the original CR transaction was accepted in Advantage. If the acceptance date of the original CR being corrected was 7/1 or later, the description will be “FY Corr Accounts Receivable”. If the acceptance date of the original CR being corrected is 6/30 or before, the description will be “FY Corr Unearned Revenue”.
  2) How the cash is to be classified, i.e. federal receivable, taxes, payroll, intergovernmental or other. Contact your accounting liaison for help in determining the correct description to use.

- **Line 2** (debit line) - use the revenue general ledger account number from the original CR document and also include on the description line the original CR document number for cross-reference purposes.

- Finally, in the “Comment” field in the header, enter the companion JVD document number for cross-reference purposes. Due to the limited spaces in this field, only enter the document number. The document number is a maximum of 11 characters, and does not include the document type (JVD) or your three-digit agency number.

b) Prepare the second JVD to record the CR in the correct fiscal year. Basically, this JVD is the reverse of the first JVD described above to correct a CR transaction.
• **Line 1** (credit line) - use the revenue general ledger account number from the original CR document and also include on the description line the original CR document number for cross-reference purposes.

• **Line 2** (debit line) - use the account type ASSET and the balance sheet account # 1000 (Cash). The description on this line MUST begin with “FY Corr” and then followed by how the cash should be classified for CAFR purposes. Corrections to CR’s will display either the description “FY Corr Accounts Receivable” or “FY Corr Unearned Revenue”. Please refer to the guidelines detailed above for Line 1.

• Finally, in the “Comment” field in the header, enter the companion JVD document number for cross-reference purposes. Due to the limited spaces in this field, only enter the document number. The document number is a maximum of 11 characters, and does not include the document type (JVD) or your three-digit agency number.

2) **Correcting a payment voucher (PV) transaction:**

a) Prepare the first JVD to reverse the original PV document in the same (wrong) fiscal year it was recorded in Advantage:

• **Line 1** (credit line) - use the expenditure/object code general ledger account number from the original PV document and also include in the description field the original PV document number for cross-reference purposes.

• **Line 2** (debit line) - use the account type ASSET and the balance sheet account # 1000 (Cash). The description used in this field MUST begin with “FY Corr” and then followed by how the cash should be classified for CAFR purposes. Corrections to PVs will display either the description “FY Corr Accounts Payable” or “FY Corr Prepaid Expense”. The description depends on two factors:
  1) The date the original PV transaction was accepted in Advantage. If the acceptance date of the original PV being corrected was 7/1 or later, the description will be “FY Corr Accounts Payable”. If the acceptance date of the original PV being corrected is 6/30 or before, the description will be “FY Corr Prepaid Expense”.
  2) How the cash is to be classified i.e. payroll, intergovernmental or other. Contact your accounting liaison for help in determining the correct description to use.

• Finally, in the “Comment” field in the header, enter the companion JVD document number for cross-reference purposes. Due to the
limited spaces in this field, only enter the document number. The document number is a maximum of 11 characters, and does not include the document type (JVD) or your three-digit agency number.

b) Prepare the second JVD to record the PV in the correct fiscal year. Basically, this JVD is the reverse of the first JVD described above to correct a PV transaction.

- **Line 1** (credit line) - use the account type ASSET and the balance sheet account # 1000 (Cash). The description used in this field MUST begin with “FY Corr” and then followed by how the cash should be classified. Corrections to PVs will display either the description “FY Corr Accounts Payable” or “FY Corr Prepaid Expense”. Please refer to the guidelines detailed above for Line 2.

- **Line 2** (debit line) - use the expenditure/object code general ledger account number from the original PV document and also include on the description line the original PV document number for cross-reference purposes.

- Finally, in the “Comment” field in the header, enter the companion JVD document number for cross-reference purposes. Due to the limited spaces in this field, only enter the document number. The document number is a maximum of 11 characters, and does not include the document type (JVD) or your three-digit agency number.

3) **Correcting a journal voucher/billing claim (JV) transaction:**
Prepare a JVD to completely reverse the original document posted to the wrong fiscal year. Then prepare a second JVD to reprocess the billing claim or journal voucher in the correct fiscal year using a new document number created by adding an “A” to the *beginning* of the original document number (note: do not add the “A” to the end of the original document number). Please contact the other agency on the document to coordinate the correction of both agencies’ postings – this is essential to ensure Budget Account Closing Forms are correct for each agency. The line description field of both JVD’s must include the original document number being corrected.
ACCOUNTING POLICIES AND PROCEDURES

ADDITIONAL GUIDANCE

ACCOUNT CODING STRUCTURE (FOR THE ADVANTAGE SYSTEM DOCUMENTS)

**Fund** - is a three-digit code, which identifies the fund in which the activity is taking place. A fund number is required on all transactions. The Controller's Office sets up all new fund numbers.

**Agency** – is a three-digit code assigned to each department or division. An agency number is required on all transactions. New agency codes are established through the Budget Division in conjunction with the Controller’s Office.

**Organization (Org)** - is a four-digit code. If your agency does not use organization, you must fill in four ZEROS (0000) in the Org field. New organization codes are established through the Controller's Office at the request of the agency.

**Sub-Organization (Sub-Org)** - is a two-digit code. This is not a required field. New Sub-Organization codes are established through the Controller’s Office at the request of the agency, and are assigned to an existing agency and organization combination.

**Appropriation Unit** – is a six-digit code, which identifies the budget account and category in which the activity is taking place. All expense/expenditure transactions and revenue transactions require an appropriation unit. New budget accounts requiring legal authority are established through the Budget Division, Department of Administration. New category codes are established by the Controller's Office at the request of the Budget Division. Appropriation units for budget accounts for transactions not requiring legal authority are established by the Controller's Office in the 6XXX series.

**Activity** – A four-digit code defined by each agency.

**Function** – A four-digit code defined by each agency.

**Object** - is a four-digit code, which identifies the appropriate expense/expenditure or disbursement GL from which an expenditure is being made. All transactions require a general ledger code for either an object, revenue source, or balance sheet account.

**Sub-object** – is a two-digit code used to further identify objects. This is not a required field. Generic sub-object codes from 01 to 99 are established in conjunction with all objects. If an agency chooses to utilize sub-objects, they are responsible for internally defining the sub-object codes used.

**Revenue Source** – is a four-digit code, which identifies the appropriate revenue GL to which a deposit/receipt is being made. All transactions require a general ledger code for either an object, revenue source, or balance sheet account. Revenue and receipt accounts are established by the Controller's Office in cooperation with the Budget Division.
Sub-revenue source – is a two-digit code used to further identify revenue sources. This is not a required field. Sub-revenue sources are set up by the Controller’s Office at the request of the agency, and are assigned to an existing revenue source.

Balance sheet account – is a four-digit code, which identifies the asset, liability, or fund balance/equity account being debited or credited. All transactions require a general ledger code for either an object, revenue source, or balance sheet account.

Job Number - is a one to eight character alpha/numeric code. All transactions involving federal funds require a job number, in which the first 5 characters must be the CFDA program number, and the 6th and 7th characters must be the last two digits of the Federal fiscal year in which the grant was awarded. The 8th character, if needed to identify several grants under the same CFDA number in the same Federal fiscal year, should be alphabetic. The job numbers are set up through the Controller’s Office. DETR, DWSS and NDOT will create job numbers for Federal grants using the CFDA number as the first 5 characters, but will assign the last 3 characters according to their own protocols until such time as they are able to comply with the numbering system.

ACCOUNTING FOR PASS-THROUGH RESOURCES – TRANSLATING ACCOUNTS

When the State receives money on behalf of a third party recipient, pass-through (translating) general ledger account numbers are used to record the receipt and subsequent disbursement. This is necessary to avoid recording revenue and expenditures at the fund level when the State is merely acting as an agent in receiving and disbursing cash.

Receipts should be posted to a translating revenue source number between 4500 and 4599, disbursements to a translating object number between 9170 and 9745. Pass-through receipt and disbursement general ledger accounts should not be used without first contacting your accounting liaison.

ACCOUNTING FOR CASH RECEIPTS

Cash receipts should be entered into Advantage the day of the deposit if possible, but not to exceed two banking days after the day of the deposit. The agency must use the actual bank deposit date as the date of record when entering the CR document in Advantage. Delays in recording cash receipts result in bank reconciliation problems for the Treasurer’s and Controller’s Offices, and must be avoided whenever possible.

If a CR has posted to the system incorrectly, prepare a new CR document to reverse the transaction, using the same document numbering as the original, but adding an “A” at the end. Then prepare another document to record the deposit correctly, using the same document numbering as the original, but adding a “B” at the end. The Agency must notify the Treasurer’s Office when a CR has posted incorrectly, as CR corrections are matched at the Treasurer’s Office on a daily basis and communicated to the Controller’s Office for the bank reconciliation. For ease of bank reconciliation, please correct CR’s in the same month that the original transaction was recorded.
USING THE MISCELLANEOUS VENDOR CODE (MISC XXX)

The Miscellaneous Vendor number is used for a vendor who, to the best knowledge of the agency, is a **ONE-TIME** vendor. It is used primarily for the refund of money previously paid to the State, or a restitution payment for the cost of damages. Any other uses of this number must be approved by the Controller’s Office. Prior to using a Miscellaneous Vendor number, the agency must implement internal controls to ensure compliance with accounting, contractual, legal and program requirements. Internal controls must ensure sensitive personal information is safeguarded.

Additionally, the Miscellaneous Vendor number is only to be used with expense/expenditure object codes that are **non-reportable** for 1099 purposes. Because a 1099 form will never be generated for a Miscellaneous Vendor, always use a T or PUR vendor number if the payment will be reportable for 1099 purposes. The Controller’s Office will be monitoring use of the Miscellaneous Vendor number throughout the year, and any inappropriate use of the Miscellaneous Vendor number must be corrected by the agency.

The Internal Revenue Service 1099 reporting status for expenses/expenditures, are available in the Data Warehouse of Nevada (DAWN), [http://dawn12.state.nv.us:7777/swmenu.htm](http://dawn12.state.nv.us:7777/swmenu.htm) under Chart of Accounts. Please see the “Vendor Manual Edition for Agency Use” in the Vendor Services section of the Controller’s Office Financial Services website, accessible through DAWN, for additional guidance on use of Miscellaneous Vendors.

PETTY CASH FUNDS

The State Board of Examiners may authorize the establishment of a petty cash account of not more than $500 for a State agency out of the agency's budgeted resources (NRS 353.252).

Petty cash funds should be maintained on an imprest basis and should remain at the amount established by the Board of Examiners. From time to time, as necessary, the fund may be reimbursed from the agency's regular funds by a voucher payable, made out to the agency petty cash fund in care of the administrator in charge of the fund, i.e., Department of Transportation petty cash in care of John Doe, custodian. The voucher payable should have attached as backup all receipts for which reimbursement is being claimed.

Petty cash funds should be used only for the purpose for which the fund was established and never used to circumvent the normal process of purchasing. For fiscal reporting purposes, use translating object 9742 to establish new petty cash funds. Use normal expenditure objects to replenish funds. To close a petty cash fund, use translating revenue source 4459.

OUTSIDE BANK ACCOUNTS

A State agency must first obtain the approval of the Board of Finance before opening an account in a financial institution. A financial institution can be a bank, credit union, savings and loan association or a brokerage house, etc. The Board of Finance approval is not required where the agency account is
specifically authorized by Statute (NRS 356.011). An agency with such authorization must adhere to the following criteria:

- Open the account in the State of Nevada's name. However, the agency’s name and the agency program may also be added;
- Submit the name of the account and name of the financial institution to the Treasurer for record keeping purposes; and
- Submit, quarterly, and at the end of each fiscal year, a reconciliation of the account to the Controller for annual reporting purposes.

The Treasurer’s office should be contacted (775-684-5600) for information and guidance on the type(s) of accounts to open and how to disburse interest earnings according to statute or regulation. For fiscal reporting purposes, use translating object 9743 to establish new outside bank accounts. To close an outside bank account, use translating revenue source 4454.

**CANCELING WARRANTS**

When a payment voucher is processed for the incorrect amount or to the incorrect vendor, a Warrant Cancel Reissue Request form must be submitted to the Controller’s Office, along with the warrant to be cancelled, or a copy of the notarized Affidavit for Lost or Stolen Warrant form completed by the vendor. These forms can be found at:

http://scointranet.nv.gov/component/edocman/guidelines-cancel-or-reissue-outstanding-warrants/viewdocument?Itemid=0,

along with instructions for either reissuing a warrant with no changes, or reissuing a warrant with changes to the original payment voucher. If an echeck (EFT) is being cancelled on or after the third day that the payment voucher was accepted into Advantage, the Treasurer’s Office must be contacted, and instructions can be found at:

**STALE ACCOUNTS PAYABLE WARRANTS**

When a warrant is not cashed within 180 days, it becomes stale and non-negotiable. According to NRS 353.135, on the face of each check is printed: “Void if not presented for payment within 180 days after issuance.” The Treasurer, by statute (NRS 353.130), will not honor a warrant presented for payment after 180 days. A job to cancel warrants whose original date of issuance is more than 180 days runs nightly in Advantage. It changes the warrant status from outstanding to stale, and creates a stale cancel transaction that posts a debit to restore cash (GL 1000) and a credit to canceled vouchers payable (GL 2001).

Agencies should print the Stale Check report in DAWN. It is the agency’s responsibility to research all stale warrants, since they originally conducted business with the vendor. Agencies have a choice of three actions on stale warrants, as follows:

- **Reissuing a stale warrant** – an agency request and a vendor affidavit or the original warrant must be sent to the Controller’s Office for a reissue. The agency request certifies the agency has not otherwise paid the vendor for this claim. The vendor affidavit asserts the vendor has not received payment for the claim and wishes to renew the claim against the State. Stale warrants are reissued from a liability account in the originating fund, not from the agency’s account coding.
ACCOUNTING POLICIES AND PROCEDURES

- **Canceling a stale warrant** – The State Controller’s Office will cancel a stale warrant under certain circumstances: if the warrant was to an incorrect vendor; if the warrant was for the wrong amount; if the warrant was a duplicate payment or was written in error; if the liability was discharged or fulfilled in another way; or if the payee owes the State and the agency wishes to use the payment to offset the receivable. Stale warrants will not be canceled if the vendor cannot be located, because a liability to the vendor still exists.

- **Leave the warrant in stale status** – if it is inappropriate to reissue or to cancel a stale warrant, the warrant will remain stale until the payee renews his or her claim against the State and requests the State Controller’s Office to issue another warrant, or until six years from the date of issuance. All warrants remaining in stale status are considered to be liabilities of the State. The warrant will remain on the Stale Dated Check report until it is reissued, canceled or six years have passed since the warrant issuance date.

- **Reversion of stale warrants after 6 years** – per NRS 353.140, the State Controller shall, in June of each year for warrants at least 6 years old, and except as otherwise provided by specific statute, recognize as revenue in the fund upon which the original warrant was drawn an amount equivalent to the original warrant. The reversion of the stale warrants will result in a balance in miscellaneous revenue at the fund level in budget accounts 9999 for each fund reverted to. For funds other than 101 and 201, this miscellaneous revenue must be reclassified into an operating budget of the fund. You will be contacted by your accounting liaison to process the necessary JVD before August 31.

### SELECTING AN OBJECT OF EXPENDITURE GL

When recording an expenditure, select an object in the expense/expenditure GL series that most closely corresponds to the type of payment being made. In addition, if the payment is being made to an outside vendor, a GL with the correct Internal Revenue Service 1099 reporting status must be used. The expense/expenditure GL selected, along with the 1099 reporting status of the vendor, will determine if the payment will be included as 1099 income. The titles for all general ledgers, as well as the Internal Revenue Service 1099 reporting status for expenses/expenditures, are available in the Data Warehouse of Nevada (DAWN), [http://dawn12.state.nv.us:7777/swmenu.htm](http://dawn12.state.nv.us:7777/swmenu.htm) under Chart of Accounts. In general, payments for services are 1099 reportable and payments for supplies are not 1099 reportable. When applicable, expense/expenditure GLs within a series are designated as supplies or services.

Refer to the General Ledger Account Definitions section of this document for descriptions of the expense/expenditure series GLs. The Governor’s Finance Office, Budget Division, also publishes a Budget Building Manual which contains guidance on use of certain expense/expenditure GLs for budgetary reporting.

### TAXPAYER IDENTIFICATION NUMBER (TIN) CONTROLS

Many agencies have access to sensitive personal information – social security numbers and employer identification numbers – that must be safeguarded. Agencies that keep this type of information should develop a policy to identify what information is kept, how to secure it, how long to keep it, and how to dispose of it securely when it is no longer needed.
All paper documents, files, CDs, disks, zip drives, tapes, backups, etc. containing sensitive personal information should be stored in a locked room or in a locked file cabinet. Access to the information should be limited to employees with a legitimate business need. Controls should be established to account for the keys and to whom they have been issued.

Require that files containing personally identifiable information be kept in locked file cabinets except when an employee is working on the file. Remind employees not to leave sensitive papers out on their desks when they are away from their workstations. Require employees to put files away, log off their computers, and lock their file cabinets at the end of the day.

Implement information disposal practices that are reasonable and appropriate to prevent unauthorized access to—or use of—personally identifying information. Reasonable measures for each agency should be based on the sensitivity of the information, the costs and benefits of different disposal methods, and changes in technology.

**REVENUE RECEIVABLE AND DEBTS DUE THE STATE**

Any agency with revenue receivable shall either record those billings in the central accounting system of the State (NRS 353.3235) or maintain a receivable subsidiary ledger and report those receivables on a quarterly basis to the Controller (NRS 353C.120). Please refer to the Controller’s Office Debt Collection Accounts Receivable Policies and Procedures, which can be found at: http://scointranet.nv.gov/component/edocman/debt-collection-policies-procedures/viewdocument?Itemid=

**REPORTING NON-CANCELABLE OPERATING LEASES**

The State must disclose future minimum rental payments for operating leases having initial or remaining non-cancelable lease terms in excess of one year, as required by Governmental Accounting Standards Board (GASB) Statement 38, *Certain Financial Statement Note Disclosures*. An operating lease is an agreement between an agency and a vendor where the risks and benefits of ownership of the leased asset are not transferred to the State. This differs from a capital lease, in which the risks and benefits of ownership are assumed by the lessee, and the lease is treated as a purchase of property by the State for financial reporting. In addition, non-cancelable means that the lease contract cannot be canceled or terminated before the end of the stated lease term. It is important to note that the presence of a fiscal funding clause does not make a lease cancelable.

Near the end of each fiscal year, the Controller’s Office will request that each agency submit a schedule of their non-cancelable operating leases. This schedule will be in a format prescribed by the Controller’s Office and must show, by year, all future payments required under the lease term. If you have any questions regarding non-cancelable operating leases, please contact your accounting liaison.

**REPORTING POLLUTION REMEDIATION OBLIGATIONS**

The State must report pollution remediation obligations and the related liability in the Comprehensive Annual Financial Report as required by Governmental Accounting Standards Board (GASB) Statement
No. 49, *Accounting and Financial Reporting for Pollution Remediation Obligations*. A pollution remediation obligating event is the occurrence of one or more of the following:

- The government is compelled to take remediation action because pollution creates an imminent endangerment to public health or welfare or environment, leaving it little or no discretion to avoid remediation action.
- The government is in violation of a pollution prevention-related permit or license, such as a Resource Conservation and Recovery Act permit.
- The government is named, or evidence indicates that it will be named, by a regulator as a responsible party or potentially responsible party for remediation, or as a government responsible for sharing costs.
- The government is named, or evidence indicates that it will be named, in a lawsuit to compel the government to participate in remediation.
- The government commences, or legally obligates itself to commence, cleanup activities or monitoring or operation and maintenance of the remediation effort.

All state agencies that have an occurrence of one or more of the above pollution remediation obligating events shall report the following information to their accounting liaison:

- Nature and source of pollution remediation obligations (for example, violation of federal laws or regulations).
- Amount of estimated pollution remediation liability – this liability should be recognized as ranges of the components become reasonably estimable; for example, different components could be legal services, site investigation or required post remediation monitoring. The “expected cash flows” measurement technique should be used to calculate the liability. For example, if potential pollution remediation outlays range from best case $1 million to worst case $3 million and no amount within the range is considered to be a better estimate than any other amount, a liability of $2 million would be reported, calculated as follows: ($1 million x 50%) + (3 million x 50%).
- Estimated recoveries reducing the liability.

You may view or download the actual GASB 49 Statement at [www.gasb.org](http://www.gasb.org).

**REPORTING SERVICE CONCESSION ARRANGEMENTS**

The State must report service concession arrangements as required by Governmental Accounting Standards Board (GASB) Statement No. 60, *Accounting and Financial Reporting for Service Concession Arrangements* (SCAs). The objective of this Statement is to improve financial reporting by addressing issues related to SCAs, which are a type of public-private or public-public partnership.

GASB Statement No. 60 defines service concession arrangements (SCAs), as an arrangement between a transferor (a government) and an operator (governmental or nongovernmental entity) in which ALL of the following criteria are met:
• The transferor conveys to the operator the right and related obligation to provide public services through the use and operation of a capital asset in exchange for significant consideration. Examples of capital assets are infrastructure or another public asset (a “facility”);

• The operator collects and is compensated by fees from third parties;

• The transferor determines or has the ability to modify or approve what services the operator is required to provide, to whom the operator is required to provide the services, and the prices or rates that can be charged for the services; and

• The transferor is entitled to significant residual interest in the service utility of the facility at the end of the arrangement. Examples of SCAs include toll roads, parking garage, and student housing.

If your agency has entered into, or is considering entering into, an arrangement that appears to meet these criteria, please contact your accounting liaison. You may view or download the actual GASB 60 Statement at www.gasb.org.

REPORTING NONEXCHANGE FINANCIAL GUARANTEES

The State must report nonexchange financial guarantees as required by Governmental Accounting Standard Boards (GASB) Statement No. Statement 70, Accounting and Financial Reporting for Nonexchange Financial Guarantees. A nonexchange financial guarantee occurs when a government guarantees a financial obligation of a legally separate entity or individual, including a component unit, but receives little or no compensation in return. The government guaranteeing the debt agrees to make payments to the holder of the debt if the entity that issued the debt is unable to fulfill its obligation. An example is the State guaranteeing the debt of local school districts in order for the school districts to obtain better borrowing rates. Information about nonexchange financial guarantees must be disclosed in the financial statements, and a liability recorded if it is more likely than not that the government will be required to make a payment on the guarantee.

If your agency has entered into, or is considering entering into, a nonexchange financial guarantee, please contact your accounting liaison. You may view or download the actual GASB 70 Statement at www.gasb.org.

REPORTING COMPONENT UNITS

The State must report component units as required by Governmental Accounting Standards Board (GASB) Statement No. Statement 61, The Financial Reporting Entity: Omnibus - an amendment of GASB Statements No. 14 and No. 34. This statement provides guidance for including, presenting and disclosing information about component units and equity interest transactions of a financial reporting entity. Component units are legally separate organizations for which the State’s elected officials are financially accountable. Potential component units (PCU) must be evaluated to determine if they qualify for reporting as a blended or discrete component unit of the primary government (State) using the following criteria of whether or not:

• The PCU is legally separate from the primary government

• The primary government holds corporate powers of the PCU
• The primary government appoints the voting majority of the governing board of the PCU
• The PCU meets fiscal dependency and financial benefit/burden criteria with the primary government
• There is a financial benefit/burden relationship between the PCU and the primary government
• The primary government can impose its will on the PCU
• It would be misleading to exclude the PCU from the reporting entity

If your agency has any entities that are potential component units, please contact your accounting liaison. You may view or download the actual GASB 61 Statement at www.gasb.org.

REPORTING INTANGIBLE ASSETS

The State must report intangible assets as required by Governmental Accounting Standards Board (GASB) Statement No. 51, Accounting and Financial Reporting for Intangible Assets. Intangible assets are defined as assets that: 1) lack physical substance, 2) are nonfinancial in nature (cannot be receivables or prepayment for goods or services), and 3) have a useful life extending beyond a single reporting period. Intangible assets consist of three broadly defined types as described below:

• Intangible assets generally defined as “software”, including internally developed or licensed software purchased from external sources;
• Intangible assets associated with real property, including easements, right-of-way, water rights, timber rights and mineral rights;
• Intellectual rights, including patents, trademarks and copy rights.

The State Controller’s Office requires agencies to identify and report intangible assets to ensure full and proper disclosure in the financial statements. If your agency has acquired any intangible assets, or is internally generating an intangible asset, please contact your accounting liaison. You may view or download the actual GASB 51 Statement at www.gasb.org.

REPORTING TAX ABATEMENTS

The State must report tax abatements as required by Governmental Accounting Standards Board (GASB) Statement No. 77, Tax Abatement Disclosures. A tax abatement is a reduction in taxes resulting from an agreement between a government and an individual/entity in which (a) the government promises to forgo tax revenues and (b) the individual/entity promises to take a specific action after the agreement that contributes to economic development or otherwise benefits the government or its citizens. The agreement can be in writing or implicitly understood between the government and individual/entity. Excluded from the scope of GASB 77 are programs where the government does not commit to abate taxes until after the individual/entity has performed the activity.

This statement requires the State to disclose tax abatement information about (a) the State’s own tax abatement agreements and (b) those agreements that are entered into by other governments and that reduce the State’s tax revenues.

If your agency has any agreements that appear to be tax abatements, please contact your accounting liaison. You may view or download the actual GASB 77 Statement at www.gasb.org.
STANDARD CHART OF ACCOUNTS

CLASSIFICATION OF GENERAL LEDGER ACCOUNTS

A classification system is a basic component of any accounting system so general ledger accounts flow in an orderly manner into the various fiscal reports which are produced. General ledger accounts are grouped into assets, liabilities, fund balance/net position, revenues, expenditures/expenses, or pass-through receipts or disbursements.

CHART OF ACCOUNTS, EXPLANATION

A chart of accounts lists in numerical order, the accounts included within the classification system. It is used to determine which general ledger account numbers should be used to code transactions being processed.

USE OF GENERAL LEDGER ACCOUNTS WITHIN CLASSIFICATION SYSTEM

All transactions are processed as revenues/receipts, expenses/expenditures, or disbursements, in order to track them through the budgetary system. Generally, no fund-level transactions are allowed except in agency funds. The following overview is a brief description of revenues and expenses/expenditures. Agencies needing more information should contact their accounting liaison.

Revenues, depending upon the type of fund (proprietary or governmental), are accounted for either when earned or when measurable and available.

Revenues, depending upon the type of fund, are accounted for either when earned (proprietary funds) or when measurable and available (governmental funds). Expenses are recorded in proprietary fund types when they are incurred, and expenditures are accounted for in governmental fund types when a liability is created. Expense/expenditure general ledger accounts are classified by object based upon their nature rather than by the purpose for which they were incurred. Agencies are required to select the expense/expenditure general ledger account which: a) most closely describes the charge being recorded, and b) has the appropriate Internal Revenue Service 1099-MISC reporting status for the transaction being recorded. More information on Form 1099-MISC reporting requirements can be found at http://scointranet.nv.gov/component/edocman/1099-basic-information-pdf/viewdocument?Itemid=

Unlike revenue general ledger accounts, expenditures do not have to be established in individual budget accounts by the Controller’s Office. The expenditure general ledger account will automatically appear once activity has been recorded to it.

Agencies can request an alternate description for revenues and expenditures within a specific budget account. Contact your budget analyst to initiate such requests.
GENERAL LEDGER SUMMARY CHART OF ACCOUNTS AND DEFINITIONS

A summary of general ledger accounts is listed below. More detail and definitions can be found in the next section on General Ledger Account Definitions. Definitions given are basic and not limited only to examples cited.

NOTE: This summary Chart of Accounts is not all-inclusive. Assets, liabilities, revenues/receipts, and expenses/expenditures/disbursements all have expanded titles within the ranges indicated. The titles for all general ledgers, as well as the IRS 1099-MISC reporting status for expenses/expenditures, are available in the Data Warehouse of Nevada (DAWN), http://dawn12.state.nv.us:7777/swmenu.htm under Chart of Accounts. Please note not all general ledger codes within a series are active. The series represent a group of designated codes for certain transactions, but not all codes have been defined and established by the Controller’s Office. If additional codes are needed within a series, contact the accounting liaison assigned to your agency.

### REVENUES/RECEIPTS

#### GL SERIES TITLE AND DEFINITION

3001-3299  **Unappropriated revenues:** These revenues are for general use by State government and not restricted for use by laws or contracts. They are fully subject to legislative appropriation and support general government services. They are deposited into the General Fund (9XXX series Budget Accounts only). Classifications of unappropriated revenues include:

- **Sales and use taxes:** Taxes imposed upon the sale or consumption of selected goods.
- **Gaming taxes:** Taxes imposed upon various gaming activities and/or receipts.
- **Other taxes:** Revenue from taxes on varied activities or products not specified in a separate classification.
- **Licenses and fees:** Licenses and fees imposed on various businesses or activities.
- **Cost Allocation Plan Recovery (GL 3276):** Charges to non-general fund supported programs for cost of central services provided to those programs by agencies supported entirely through general fund appropriations.
- **Charges for services:** Revenues from providing services or products usually segregated under functional and activity groupings.
- **Interest earnings:** Revenues derived from charging for the use of money.
- **Other general revenue:** Miscellaneous revenue not classified under separately established definitions.

3300-4350  **Revenues:** Resources for which the expenditure is authorized for specified activities.

- 3300-3342 - Taxes
- 3401-3600 - Federal Grants
- 3601-3799 - Licenses and Fees
- 3801-4350 - Charge for Services and Other Revenues
  - 3860-3866 – Medicaid Charges
  - 4230-4238 – Cost Allocation
  - 4265-4269 – Private Grants

3351-4355  **Expense/expenditure reductions:** Reimbursement of a current year expense/expenditure. Note: Minor amounts should be credited against the original expense/expenditure account.

4401-4499  **Translating/asset reductions:** Any collection of a loan or other receivable. These GL’s translate to a balance sheet account.  *Contact Controller’s Office for approval.*

4500-4599  **Translating/pass-through receipts:** In-flow of assets from a source that are to be passed on for use by another entity. For more information, see guidance in section on Accounting for Pass-Through Resources. These GL’s translate to a balance sheet account.  *Contact Controller’s Office for approval.*

4600-4781  **Transfers in from State agencies:** All inter/intra-fund transfers, e.g., legally authorized transfers between agencies or funds.
Must be offset by a transfer-out GL in the series 9001-9169.

4666 – **Transfer of Bond Proceeds Only**: may only be used to receive bond proceeds being transferred in from another budget account, and must be offset by GL 9067.

**4790-4794 Transfers in - General Fund Unappropriated**: To be used only for transfers made to General Fund unappropriated revenues (9XXX budget accounts). Must be offset by a transfer-out GL in the series 9001-9169.

**4860-4869 Fund level transfers**: reserved for Controller’s Office use only.

**4870-4999 Non-operating items**: Any in-flow of assets from other funds not classifiable as revenue, transfers or pass-through receipts. *To be used only after contacting Controller's Office for approval.*

**EXPENSES/EXPENDITURES/DISBURSEMENTS**

</table>
**Non Motor Pool in-state:** Charges for non-Motor Pool Division rental of vehicles used for travel.

**Auto miscellaneous in-state:** Miscellaneous auto charges for vehicles used in travel status.

**Public transportation in-state:** Costs of transportation including taxicabs, limousine service, buses, railroads, rented vehicles, ATV rentals and other forms of transportation associated with travel, excluding personal vehicles, airplanes and Motor Pool Division vehicles. Expenses/expenditures can be paid in the form of reimbursement to employees or board or commission members.

**Personal vehicle in-state:** Reimbursements made to employees or board or commission members while on State business for using their personal vehicle or aircraft, when used either for the convenience of the employee or the State. This can be used for airfare in lieu of mileage.

**Commercial air transportation in-state:** Costs of commercial airplane transportation that can be directly paid to travel agencies or airlines or to employees or board or commission members for ticket reimbursements.

**State-owned air transportation in-state:** Charges for transportation on State-owned aircraft. This includes pilots’ per diem charges.

**Travel card charges in-state:** Charges by travel card companies and banks for cash advances (ATM fees) and for late fees. These charges are usually for travel reimbursement to the employee or board/commission member.

---

**7000 – OPERATING EXPENSES SERIES**

**Operating supplies:** General office supplies including office stationery, forms, pens, pencils, ink/toner, copy paper, and costs paid for functional supplies; i.e., chemicals, laboratory supplies, cleaning and sanitation supplies, feed for animals, household and institutional supplies and recreational supplies.

**Freight and delivery charges:** costs for freight and delivery, such as Federal Express and UPS.

**Communication repair services:** costs paid for services to repair communications equipment. Payments to outside vendors for services are reportable to the Internal Revenue Service as miscellaneous income.

**Printing and copying services:** Printing, copying, binding, microfilming, imaging, annual reports, outside printing and similar services. Payments to the Printing Division are to be charged to GL series 7045-7049. Payments to outside vendors are reportable to the Internal Revenue Service as miscellaneous income.

**Insurance:** Costs other than those related to personnel services, including bonds, vehicle insurance, property and contents insurance, and deductible paid to EICON. Payments to outside vendors are reportable to the Internal Revenue Service as miscellaneous income.

**Contract services:** Services under contract with outside vendors which may include goods or deliverables. Payments to outside vendors for contractual services other than individual foster care and pharmaceutical goods are reportable to the Internal Revenue Service as miscellaneous income. NOTE: Contracts for capital leases, capital assets and construction should be charged to the appropriate capital account in the GL series 8200-8419. Contracts for operating leases should be charged to the appropriate operating lease account in the GL series 7980-7984.
7060-7072 – General (non-medical) contract services.
7073 – Contracts for maintenance of software.
7074 – Contracts for maintenance of hardware.
7075 – Contracts for medical and health care.
7076 – Contracts for pharmaceutical goods and medications (not reportable to the Internal Revenue Service).
7077 – Contracts for foster care in the foster care provider’s home (not reportable to the Internal Revenue Service).
7078 – Contracts for foster care in a professional setting.
7079 – Contracts for purchase of goods or materials (not reportable to the Internal Revenue Service).

7080-7086 Legal and court expenses/expenditures: Charges for legal services and court expenses from the Attorney General's Office (unless collected through the Attorney General cost allocation plan) or an outside entity. Payments to outside vendors are reportable to the Internal Revenue Service as miscellaneous income.

7087 Nonexpert witness fees: Payments to individuals acting as a nonexpert witness. Not reportable to the Internal Revenue Service.

7088 Expert witness fees: Payments to individuals acting as an expert witness. Reportable to the Internal Revenue Service as miscellaneous income.

7110-7119 Non-State-owned building rent: Costs for renting or leasing buildings not owned by the State. This account also includes the costs for renting or leasing space for storage, meetings or conferences and all costs associated with drafting leasing agreements. Payments to outside vendors, except real estate agents, are reportable to the Internal Revenue Service as rental income.

7120-7129 Advertising and public relations: Payments for printed announcements in professional periodicals and newspapers or for radio or television announcements. Payments to outside vendors are reportable to the Internal Revenue Service as miscellaneous income.

7130-7139 Utilities and waste disposal: Bottled water, hazardous waste disposal, electric, heating oil, gas, propane, garbage disposal, water and sewer services, other utilities (i.e., cable TV) as well as payments to Buildings and Grounds for water usage.

7140-7149 Maintenance of buildings and grounds: Payments to outside vendors for maintenance services or for supplies (lumber, paint, electric supplies, hardware supplies, heating/air conditioning supplies and shop supplies needed for maintenance). Payments to outside vendors for services are reportable to the Internal Revenue. Payments to outside vendors for supplies are not reportable to the Internal Revenue Service.

7150-7159 Vehicle operation: Agency-owned vehicle operation, maintenance, gasoline and other similar costs. Payments to outside vendors for services are reportable to the...
Internal Revenue Service as miscellaneous income. Payments to outside vendors for supplies are not reportable to the Internal Revenue Service.

**Aircraft operation:** All expenditures involved in the maintenance and operation of aircraft owned by an agency. Payments to outside vendors for services are reportable to the Internal Revenue Service as miscellaneous income. Payments to outside vendors for supplies are not reportable to the Internal Revenue Service.

**Clothing/uniform/tool allowance:** Reimbursement to employees for the purchase of clothing, uniforms or tools used in their work, the outright purchase of these items on behalf of the employee and the maintenance of these items. Payments for these items may be reportable to the Internal Revenue Service as miscellaneous income.

**HSA employer contribution:** Limited to use by Public Employees Benefits Program to record the employer’s contribution to employee’s health savings accounts.

**Medical and dental services:** Non-contracted medical or dental services, including staff physicals and testing. Payments to outside vendors for services are reportable to the Internal Revenue Service as medical income.

**Medical and dental supplies/appliances:** Medical and dental supplies or appliances that are not part of an approved contract; includes prescription drugs, non-prescription drugs, pharmaceutical supplies, and other medical supplies and appliances. Payments to outside vendors for supplies are not reportable to the Internal Revenue Service.

**Stipends, commissions and prizes:** Stipends: Payments (to non-state employees) for an allowance to offset certain expenses, or as an honorarium; includes inmate payrolls; also includes payments to individuals in association with a fellowship or grant. Commissions: Percentage of sales given to individuals; includes payments to employee associations for vending machine proceeds. Prizes paid in the form of cash. Payments to outside vendors are reportable to the Internal Revenue Service as miscellaneous income. Any payments to State employees are reportable to the Internal Revenue Service on the W-2.

**Food:** Purchased for human consumption only.

**MSA programmer charges:** Non-DOIT IT labor including programming, project management, quality assurance and PC/LAN technician from outside vendors through Master Services Agreement contract.

**Other EDP service costs (non-EITS):** Costs related to maintaining an in-house EDP system. Includes licensing renewals or subscriptions as well as online licensing renewals or subscriptions such as a subscription to Creative Cloud, which allows access to newest software versions, and licenses to allow virtual access to software. Does not include the initial purchase of software or hardware. Payments to outside vendors for services are reportable to the Internal Revenue Service as miscellaneous income. NOTE: Costs related to software license maintenance and hardware license maintenance contracts are to be coded to GL 7073 and 7074, respectively; costs for purchase of software and hardware are to be coded to GL series 7770-7772 and 8370-8374, respectively.

**Minor building improvement and repair services:** Costs of building, remodeling projects totaling less than $500,000 and not done by the Buildings and Grounds Division. Payments to outside vendors for services are reportable to the Internal Revenue Service as miscellaneous income.
7240-7241 **Host fund expenses/expenditures:** Payments for special entertainment for dignitaries. Host Funds must have prior approval of the Legislature. Payments to outside vendors for services are reportable to the Internal Revenue Service as miscellaneous income.

7250-7255 **Buildings and Grounds special services:** Services provided by the Buildings and Grounds Division at the request of the agency such as minor office remodeling, furniture construction, moving, installation of shelving, minor repairs, etc. The Buildings and Grounds assessment on non-state owned building rent should be charged to GL 7255.

7260-7261 **Taxes and assessments:** Property taxes or other assessments being paid that have been passed through to the State through leases. NOTE: The State should not pay taxes of any kind and State agencies should negotiate these out of their lease agreements if possible.

7265-7269 **Claims costs & payments:** Payments for various claims costs and expenses.

7270-7279 **Interest expenses/expenditures:** This account includes all charges paid for the use of money. Costs of leasing equipment under a capital lease agreement (See definition for GL series 8410-8412) should be split between general ledger accounts 7270 and 8410 series. Note: Any penalties, fines, late fees or interest assessed and paid as a result of a late payment should not be recorded here, but instead must be recorded as part of the payment to which it relates. Payments to outside parties are reportable to the Internal Revenue Service as interest income.

7280-7286 **Postage:** Includes charges that are paid to the U.S. Post Office or to the State Mail Room.

7289-7299 **Telephone:** Costs for regular monthly service charges for telephone, facsimile, communication lines, voice mail, cell phones and pagers. Also includes charges for long distance and telephone and data wiring.

7300-7306 **Dues and registrations:** Memberships in professional or other organizations and associations. Also includes fees for taking classes or attending seminars. Payments to outside vendors are reportable to the Internal Revenue Service as miscellaneous income. GL 7306 is to be used for reimbursing employees for registration fees, and is not reportable to the Internal Revenue Service for 1099 purposes.

7307 **Undercover operations:** Advance funding for undercover operations. Not reportable to the Internal Revenue Service for 1099 purposes.

7310-7312 **Power & gas purchases:** Electrical power and gas purchased for resale to utility districts.

7320-7324 **Instructional supplies:** Payments for teaching aids which are used in workshops or training seminars. These may include films, multiple reference books or any other supply that can appropriately be classified as a training item and costs less than $5,000.

7330-7334 **Special report services and fees:** Costs incurred for computer searches and other special fees that cannot be charged to the printing and copying accounts in the GL series 7040-7049. Payments to outside vendors are reportable to the Internal Revenue Service as miscellaneous income.

7340-7345 **Inspections and certifications:** Inspections required by State agencies for sanitation, public safety and other related areas. Payments to outside vendors are reportable to the Internal Revenue Service as miscellaneous income.

7350-7359 **Court Awards:** Court awards, torts, settlements and interest for physical injury, property damage, punitive damages or compensatory damages paid to plaintiffs or
to attorneys. Payments to plaintiffs (except for physical injury or property damage) and to attorneys are reportable to the Internal Revenue Service.

- 7350-7351 – Physical injury or property damages paid to a plaintiff.
- 7352 – Physical injury or property damages paid to an attorney. Payments to attorneys are reportable to the Internal Revenue Service as gross proceeds.
- 7353 – Punitive damages paid to a plaintiff. Payments for punitive damages to plaintiffs are reportable to the Internal Revenue Service as miscellaneous income.
- 7354 – Punitive damages paid to an attorney. Payments to attorneys are reportable to the Internal Revenue Service as gross proceeds.
- 7355-7356 – Compensatory damages paid to a plaintiff. Payments for compensatory damages to plaintiffs are reportable to the Internal Revenue Service as miscellaneous income.
- 7357 – Compensatory damages paid to an attorney. Payments to attorneys are reportable to the Internal Revenue Service as gross proceeds.
- 7358 – Interest paid to a plaintiff. Payments for interest are reportable to the Internal Revenue Service as interest income.
- 7359 – Interest paid to an attorney. Payments to attorneys are reportable to the Internal Revenue Service as gross proceeds.

7360  
**University operations:** Monthly draw-downs for the Nevada System of Higher Education (for University use only).

7370-7374  
**Publications and periodicals:** Subscriptions to newspapers, magazines, publications and periodicals or their cost on an individual basis. Includes CD ROM’s.

7380-7382  
**Employee moving expense/expenditures:** Moving expenses resulting from the transfer of a permanent State employee from one community to another in accordance with the provisions of SAM Section 0238.

7384  
**Statewide Cost Allocation:** Payments to the General Fund for the Statewide Cost Allocation Plan. Must be offset by GL 3276.

7385  
**Staff Physicals:** payments for employee physical exams required by OSHA.

7386  
**State Treasurer’s Assessment:** to be used by Treasurer’s Office only, in conjunction with revenue source 4330, when issuing debt.

7387-7388  
**NHP and NDOT cost allocations:** payments for NHP dispatch cost allocation should be coded to GL 7387, and payments for NDOT radios cost allocation should be coded to GL 7388.

7389  
**HR centralized personnel services:** allocation of HR services to agencies.

7390  
**Credit card discount fees:** Costs associated with accepting credit card payments for goods or services. These fees are paid to the banking systems and represent the State’s cost for accepting credit cards.

7391  
**Attorney General cost allocation:** Cost of all non-litigation legal services provided to State agencies by the Office of the Attorney General.

7393  
**Purchasing assessment:** Payments to support the Purchasing Division.

7394-7399  
**Agency-specific cost allocations:** Internal payments by an agency’s budget account for charge for services provided by another budget account. Must be offset by a cost allocation reimbursement GL in the series 4230-4235.

7400-7409  
**Client service provider payments:** Payments to service providers to benefit clients (not to be used for payments to clients). Includes payments for travel; the cost of Motor Pool vehicles used to transport clients; client escorting costs;
payments for professional, training or rehabilitation services; payments for attendant care (i.e., interpreter services) and services to disabled clients. Payments to outside vendors for services are reportable to the Internal Revenue Service as miscellaneous income. NOTE: client rent providers are to be paid with GL 8778 or 8779.

7410-7419 Client medical provider payments: Payments made directly to medical, dental and health service providers to benefit clients. Payments to outside vendors for medical services are reportable to the Internal Revenue Service as medical income.

7420-7429 Client material provider payments: Payments made directly to providers of goods, materials, utilities or supplies to benefit clients, including training materials, rehabilitation materials, client canteen purchases, purchase of clothing for client use, purchase of prescription or non-prescription drugs, purchases of adaptive equipment (i.e., wheelchairs, etc.). If the payment includes both goods and services, use GL series 7400-7409 for non-medical payments, or 7410-7419 for medical payments.

7430-7439 Professional services: Services not otherwise listed that are provided on a non-contractual basis, including CPAs, consultants, architects, professional training services or temporary employment services. Use GL series 7080-7089 for legal services and 7180-7189 for medical, dental and health care services. Payments to outside vendors for services are reportable to the Internal Revenue Service as miscellaneous income.

7440 Interview expenses/expenditures: Payment of travel expenses to interview candidates for employment.

7445-7448 Scholarships: Payments made to a degree candidate for tuition, fees, books, supplies or equipment to attend an educational institution. Payments for room and board, teaching, research or other services are considered wages and should be reported on the individual’s W-2 form. If you think payments should be reported on a W-2, please contact the Controller’s Office for guidance.

7449 Prepaid tuition payments: Disbursements to an institution of higher education for tuition or other fees associated with a state-sponsored prepaid tuition program.

7460-7464 Equipment under $1,000: Equipment purchases with a unit cost of less than $1,000 should be charged here. These purchases are not capitalized, but should be inventoried by the agency.

7465-7469 Equipment between $1,000-$5,000: Equipment purchases with a unit cost between $1,000 and $5,000 should be charged here. These purchases are not capitalized, but should be inventoried by the agency.

7500-7502 Payments to individuals for services: Use for payments to individuals not properly classified as a contract or professional service or in some other available general ledger. Payments to individuals for services are reportable to the Internal Revenue Service as miscellaneous income.

7506-7559 EITS charges: payments to Department of Administration Enterprise IT Services for various charges.

7560-7579 Internal service funds only: Various expense general ledger accounts for use by Internal Service Funds only.

7630-7639 Miscellaneous expenses/expenditures: Amounts paid for goods and materials (7630-7634) or services (7635-7639) not properly classifiable in one of the general ledger accounts included in the 7000 series. Payments classified here should be occasional in frequency and minor in amount. If the payment includes both goods
and services, use GL series 7635-7639. GL 7637 is to be used only for notary fee application and renewal payments. Payments to outside vendors for services are reportable to the Internal Revenue Service as miscellaneous income.

**Refunds:** Payments to refund amounts received in excess of what was due, including refunds of revenue where the agency wants to show gross revenue and refunds separately. GL 7659 is to be used only for the Senior Citizens Property Tax Refund to refund qualified senior citizens property taxes on owned or rented property.

**Non-State employee In-State travel:** In-State travel expenses for consultants and other persons not considered State personnel on an accountable plan basis only. This includes payments of travel expenses to an individual under a contract which does not include travel expenses in the contract. If the contract specifies travel expenses are included in the contract amount, then use GL series 7060-7072.

**Non-State employee Out-of-State travel:** Out-of-State travel expenses for consultants and other persons not considered State personnel on an accountable plan basis only. This includes payments of travel expenses to an individual under a contract, which does not include travel expenses in the contract. If the contract specifies travel expenses are included in the contract amount, then use GL series 7060-7072.

**Computer software:** Costs for purchases of computer software. Use GL 7770 if $5,000 or more per license and GL 7771-7772 if less than $5,000. When renewing software licenses, use GL series 7220-7226 (Other EDP Service Costs (Non-EITS)). For software and hardware maintenance contracts, use GL 7073 and 7074, respectively.

**Nursery and farming supplies:** Costs of supplies related to raising trees, plants and livestock (used by the Department of Corrections, Department of Conservation and Natural Resources and Department of Wildlife).

**Debt service funds only:** Various expenditure general ledger accounts for use by debt service funds only. Payments to outside vendors for interest are reportable to the Internal Revenue Service as interest income. Payments to outside vendors for fees are reportable to the Internal Revenue Service as miscellaneous income.

**NDOT In-House:** For use by Nevada Department of Transportation only.

**Rent subsidy:** Reimbursement received for excess rent paid by an agency because of a mid-year relocation. Payments to outside vendors for rent are reportable to the Internal Revenue Service as rental income.

**Land/equipment rental:** Rental payment for use of equipment or land. Payments to outside vendors for rentals are reportable to the Internal Revenue Service as rental income.

**Materials:** Materials to be used in the process of producing or manufacturing a finished product; i.e., stockpiles of gravel, sand, aluminum and other similar items.

**Operating lease expense:** Payment for the use of property where the risks and benefits of ownership are not transferred to the State. There must be a signed lease agreement. Payments to outside vendors for lease payments are reportable to the Internal Revenue Service as rental income.
### 8000 – CAPITAL OUTLAY SERIES

<table>
<thead>
<tr>
<th>GL SERIES</th>
<th>TITLE AND DEFINITION</th>
</tr>
</thead>
<tbody>
<tr>
<td>8100</td>
<td><strong>Land:</strong> The original cost of purchasing land.</td>
</tr>
<tr>
<td>8101</td>
<td><strong>Non-cash capital improvements:</strong> value of capital improvements not paid for with cash.</td>
</tr>

</table>
**ACCOUNTING POLICIES AND PROCEDURES**

8320-8321  **Used major equipment:** Major equipment items purchased used.
8330-8334  **Office and other equipment:** Equipment purchased for office and residential use, and other small equipment items not properly classified as major (GL series 8250-8252).
8340-8341  **Special purpose vehicles:** Utility vehicles and riding maintenance equipment.
8350-8351  **Used furnishings:** Items that would be classified under object 8240, if new.
8360  **Automobiles - new:** Purchase of new passenger cars.
8370-8374  **Computer hardware:** Cost of outright purchases of computer hardware; e.g., terminals, printers, modems, disk drives, etc.
8380-8381  **Used vehicles:** Includes pick-ups, vans, automobiles and special purpose vehicles purchased used.
8390-8394  **Miscellaneous equipment:** Firearms, hand tools and other small equipment items with a useful life of 3 years or more.
8401  **Major equipment repair/improvement services:** Repair or improvement services for major equipment items which are substantial and extend the useful life beyond what was originally expected or which increase the capacity or operating efficiency of the item. Payments to outside vendors for services are reportable to the Internal Revenue Service as miscellaneous income.
8410-8412  **Principal installment/lease purchase:** Principal portion of installment purchases and lease payments on capital leases. Contact your accounting liaison for guidance on determination of capital leases. A copy of all lease agreements must be forwarded to the Controller's Office and an amortization schedule breaking down the lease payments into principal and interest will be furnished to the agency. Interest portion of payment is to be coded to the interest expense series (See definition for GL series 7270-7279).

8430-8499 – **BOND AND REMIT SERIES**

**GL SERIES**  **TITLE AND DEFINITION**
8430  **Arbitrage Payments:** Payments to the US Government for arbitrage costs associated with bond issues.
8470  **Refunding Payments:** Costs associated with the refunding of bond issues.
8499  **Remit to Federal Government:** For various payments to the federal government. *Do not use without contacting Controller’s Office for approval.*

8500 – **AID TO NEVADA GOVERNMENTAL UNITS SERIES**

**GL SERIES**  **TITLE AND DEFINITION**
8501-8549  Aid to Nevada counties and cities.
8550-8551  Aid to Nevada boards and commissions.
8560-8599  Aid to other Nevada governmental units.

8600 – **AID FOR EDUCATION AND TRAINING SERIES**

**GL SERIES**  **TITLE AND DEFINITION**
8601-8619  Aid for school districts.
8620-8639  Aid for private schools, charter schools and training institutes.
8640-8649  Aid for institutions of higher education.
8651  Intergovernmental – Other – *for Controller’s Office use only.*
8660-8699  Aid for private schools, charter schools and training institutes (continuation of 8620-8639).
### 8700 – AID OR GRANT SERIES

<table>
<thead>
<tr>
<th>GL SERIES</th>
<th>TITLE AND DEFINITION</th>
</tr>

</table>
| 8700-8740 | **Aid to individuals:** Payments to clients for welfare and other public assistance benefits, including non-medical payments from the State fund for victims of crime.  
- **8730 – Work training program:** Payments by the Welfare Division to a client for taking part in a work-training program where the payments do not total more than the welfare benefits the client would have received otherwise. If it is not known if payments will exceed aid, use GL 8729.  
- **8731 – Work Training Program Stipends:** Payments by the Welfare Division to a client for taking part in a work-training program where the payments exceed the welfare benefits the client would have received otherwise. The entire amount is considered to be income to the client. Payments to clients under these conditions are reportable to the Internal Revenue Service as miscellaneous income. |
| 8741 | **Subsidy to individuals:** payments to individuals for subsidies. Reportable to the Internal Revenue Service as miscellaneous other income. |
| 8750-8759 | **Aid to private service providers:** Aid payments to service providers to benefit clients. These can include payments for professional services, transportation, training, rehabilitation or attendant care. Payments to outside vendors for services are reportable to the Internal Revenue Service as miscellaneous income. |
| 8770-8779 | **Respite Care, Foster Care and Client Rent:**  
- **8770-8772 – Payments to individuals or entities who care for clients on a temporary basis in place of the parents or foster parents (Respite Care).** These payments are reportable to the Internal Revenue Service as miscellaneous income.  
- **8773-8774 – Payments to individuals providing foster care in their homes to less than 5 qualified foster individuals 19 or older; or payments to individuals providing difficulty of care assistance to less than 5 qualified foster individuals 19 or older or less than 10 qualified foster individuals under 19.** Not reportable to the Internal Revenue Service for 1099 purposes. NOTE: for contracted foster care payments, use GL series 7077-7078; for payments to institutions, use GL 8776 or 8777.  
- **8775 – Reimbursements to foster care providers for medical expenses.** Not reportable to the Internal Revenue Service for 1099 purposes.  
- **8776-8777 – Payments to professional foster care providers, institutions and individuals providing either: 1) foster care to more than 5 qualified foster individuals 19 or older; or 2) difficulty of care assistance to more than 5 qualified foster individuals 19 or older or more than 10 qualified foster individuals under 19.** These payments are reportable to the Internal Revenue Service as miscellaneous income.  
- **8778 – Payments for living quarters or non-state owned equipment on behalf of clients.** These payments are reportable to the Internal Revenue Service as rental income.  
- **8779 – Payments to real estate agents for living quarters on behalf of clients.** If you do not know if the payee is a real estate agent, use GL 8778. |
Aid to non-profit service providers: Aid payments to non-profit service providers to benefit clients. These can include payments for professional services, transportation, training, rehabilitation or attendant care.

Grants: Grant payments to individuals or organizations, including certain federal or state energy grants and other grants financed by the federal or state government such as grants to promote the arts. Federal grants are ordinarily taxable unless stated otherwise in the enabling legislation. Grants are reportable to the Internal Revenue Service as grant income.

Non-taxable grants: Grant payments to individuals or organizations where the enabling legislation states the grant is not taxable. Proof of the tax-exempt status must be on file with the Controller’s Office.

Various expenses/expenditures: These general ledger numbers should not be used without contacting the Controller’s Office for approval.

9000 – TRANSFER/DISBURSEMENT SERIES

GL SERIES TITLE AND DEFINITION

9001-9169 Transfers out to State agencies: All inter/intra-fund transfers, e.g., legally authorized transfers from a fund receiving revenue to the fund through which the resources are to be expended.
- Must be offset by a transfer-in GL in the series 4600-4781.
- 9067 – Transfer Out Bond Proceeds Only: may only be used to transfer out bond proceeds to another budget account, and must be offset by GL 4666.

9170-9699 Translating/Pass-through disbursements: Do not use without contacting Controller’s Office for approval. Not an expenditure, but represents reduction to a liability or increase to an asset. These GL’s translate to an asset or liability balance sheet account and generally represent the disbursement of cash received by the State in a pass-through capacity. For more information, see guidance in section on Accounting for Pass-Through Resources.

9700-9709 Translating/Inventory: Inventoried items purchased for resale to the public.

9710-9745 Translating disbursements: Do not use without contacting Controller’s Office for approval. Not an expenditure, but represents reduction to a liability or increase to an asset. These GL’s translate to an asset or liability balance sheet account.

9760-9769 Fund level transfers: reserved for Controller’s Office use only.

9770-9827 Other disbursements: These general ledger numbers should not be used without contacting the Controller’s Office for approval.
